PillarRx 3.0- Target Architecture

AI-powered | Unified Member View | Intelligent Decisioning | Automated Workflows | Scalable and Real-time

Experience & Access

Care Team Portal (Web)
- 360-degree member view
- Work queue
- Recommended actions
- Case management

Client / Partner Portal (future)
- Reporting
- File status
- Integration APIs
- Self-service

External APIs
- PBMs / Clients
- Manufacturers
- Providers / Pharmacies

Application & API Layer

ASP.NET Core / C#

- API Gateway & BFF
- Member Service
- Opportunity Service
- Program Service
- Rule Service
- Workflow Orchestration
- Case/Task & Outreach Service
- Notification Service
- Integration Service

Data Sources & Integrations

PBMs / Clients
- Claims, member, benefit data
- Plan data, Formulary Data

Manufacturers
- Rebate programs
- Coupons

Pharmacies
- Prescription data
- Dispensing data

Members
- Demographics
- Eligibility
- Communications

External Data
- 340B
- ESI / coupons
- Drug information

AI-Driven Extraction/Ingestion

Databricks framework

1. File/API detection
2. Schema inference
3. AI mapping (LLM)
4. Validation and quality
5. Mapping approval
6. Automated pipeline
7. Exception handling

Ingest new file types in hours/days

LAKEHOUSE | Data Platform

Bronze Raw / Ingested
- Source files
- Raw claims and member data
- Immutable storage

Silver Canonical
- Normalized and cleansed
- Canonical pharmacy model
- Master data

Gold Business Views
- Member 360
- Claim 360
- Benefit opportunities
- Analytics, Reporting and ML features

Data & Analytics Services
Delta Lake | Unity Catalog | ML / AI | SQL Analytics | Streaming

Oper/Transaction DB

Lakebase PostgreSQL

- Cases and tasks
- Workflow instances
- Rules and decisions
- Benefit opportunities
- Audit and logs

- Unified member view
- Pre-joined optimized data
- Near real-time updates

Legacy MemberOps

Phase-out

- SQL Server DB
- Stored procedures
- Legacy UI

Legacy Integration Layer
- CDC / data sync
- Event bridge
- Capability routing

Event & Messaging Layer

- Azure Service Bus — Transactional messaging
- Event Grid — Events and notifications

All components enclosed in the dotted boundary are within eNobleon's delivery scope

AI & Decisioning Services

- Natural Language Rules — LLM + validation
- Rules Engine — Deterministic
- Benefit Optimization — ML + heuristics
- Decision Explainability — Transparency and audit
- GenAI Assistant — Care team / member

Platform Foundation

- Compute — AKS / App Service
- Storage — ADLS Gen2
- Networking — VNet / Private Endpoints
- Security — Entra ID, Key Vault, RBAC
- Observability — App Insights, Log Analytics
- DevOps — GitHub / Azure DevOps
